COMPACT WORKSTATIONS

MakeStation[®]

Every packing and despatch operation involves a lot of administration - which is closely related to the operation and needs to be located nearby. Our range of compact modular workstations provide at least enough space for a laptop and a cup of coffee!

Where else could you find a desk that is 600mm wide? That might sound pretty tight, but if you need storage units, these can be alternated with desks to give the necessary elbow room.

Designed and Manufactured in the UK with solid 18mm MFC panels all round, this range of modular desking and storage is built to take the rough and tumble of warehouse life.

- * Manufactured to order
- * Free Delivery
- * 6 Colour Finishes Available

British - through and through

MakeStation[®] Workstation Range

The Modular Workstation range has a 540mm deep work surface which includes a 40mm overhang at the back to allow space for power points and skirting boards.

The Work Surface is set at a standard height of 720mm so that all of these units work together to create a clean and uniform working area.

MS-DSK60-W - 600mm wide workstation - ideal for placing alongside the storage options

MS-DSK85-W - 850mm wide workstation - a compact standalone option

MS-DSK120-W - 1200mm wide workstation - a more conventional size allowing for a larger range of equipment.

MS-DLK60-W - 600mm wide workstation with the pull-out work surface for Keyboard and Mouse

MS-DLK85-W - 850mm wide workstation with the pull-out work surface for Keyboard and Mouse

MS-CWS85-W - 850mm wide workstation with the pull-out surfaces for everything!

MS-CWS85-W - 940mm x 940mm corner workstation to utilise a corner and maintain the uniform appearance
